Anvil International can trace its roots back to the 1800s. Today, we remain the largest and most complete fitting and hanger manufacturer in the world, with manufacturing facilities in Columbia, PA; Henderson, TN; Longview, TX; Simcoe, Ontario; and North Kingston, RI. Together, we produce a package of quality products unmatched by any other single manufacturer.

Supply Sales Company, formerly Grinnell Supply Sales and Manufacturing, is now Anvil International, Inc. The new name reflects a revitalized organization with a clear sense of purpose and direction. This new vision will allow Anvil International to better meet the flow control needs of its customers with focused product offerings that include Gruvlok® fittings and valves, malleable, forged and cast iron fittings, couplings, hangers and supports.

EZFlow Pipe-10' ASTM F-40

EZflow by Infiltrator is an environmentally friendly replacement to traditional stone and pipe drainfields using an engineered geosynthetic aggregate modular design. The EZflow system is designed to improve infiltration performance by eliminating the fines associated with crushed stone, and reducing compaction and embedment associated with stone. Preassembled units include a 3" or 4" perforated pipe surrounded by aggregate and held in place with a durable high-strength netting. This product comes in easy-to-contour 5' and 10' lengths and in diameters of 7, 8, 9, 10, 12, 13, or 14 inches.

- Always clean and free of fines
- Bundles are quick to install, saving costs on heavy machinery and labor
- Modular construction allows configurations to match trench dimensions for most system shapes and sizes
- Engineered for optimal storage and absorption efficiencies
- Ability to contour along sloped sites and around trees or landscaping
- Lightweight system is perfect for repairs and tight job sites
- Easily hand-carried into position reducing time and labor
- 10' lengths with simple snap, internal couplers
- Easier cleanup at the job site with the elimination of stone
- Manufactured from recycled materials rather than a mined natural resource
- Approved in many jurisdictions with an increased efficiency rating, reducing drainfield size
- Backed by the leader in the onsite wastewater industry

SureSeal Trap Devices

- Preassembled Inline Floor Drain Trap Sealer. 3 pieces: 1 commercial grade ABS plastic housing & proprietary neoprene rubber diaphragm with 2 soft rubber sealing gaskets.
- Creates a physical barrier to block sewer gases and their odors from escaping.
- New Construction: Used in floor drains to provide added protection against escaping sewer gases. Eliminates the need to repair/replace trap primers when they fail.
- Retrofit: Used in situations where trap primers have failed or where trap primers were never installed.

Multiflex Thermostatic Mixing Valve

- Tank Booster Pro includes: Valve, Flex Hose, Tee can effectively double a households hot water heater capacity while while delivering hot water at safe temperatures
- Use with SharkBite® Flexible Water Heater Connectors for easy installation in systems using copper, CPVC or PEX tubing.
- Adjustable thermostatic mixing valve: Allows water to be stored at 140°F (60°C), which helps prevent the growth of Legionella bacteria,while keeping distributed water temperature at a safe 120° or below to prevent scalding.
- Precise temperature control - Design for point-of-use and point-of-source applications.
- Energy saving design - Decreases potential heat loss in household systems by up to 20%.
- More hot water from the same water heater - Higher storage temperature means a greater effective hot water volume, up
- Ease of use: - No soldering or glue. Quicker to install then a traditional t-pattern valve.

HG 145 Heatguard® Thermostatic Mix Valve

- Point-of-use thermostatic mixing valve designed to assist in the prevention of scalding.
- Superior, fast acting thermostatic element provides stable operation at flow rates as low as 0.34 gpm or as high as 5.8 gpm.
- Reduces the outlet flow to a trickle in the event of cold water supply failure.
- Inlet connections are typical supply line 3/8OD tube.
- Check valves at hot and cold water inlets.
- Compact design easily fits under or behind a single basin.
- Adjustable outlet temperature range: 95-118°F

LFUSG-B Guardian Thermostatic Mix Valve

- Series LFUSG-B Lead Free* Under Sink Guardian Thermostatic Mixing Valves are used in commercial and residential under-the-sink installations to maintain hot water at a desired temperature to avoid the risk of accidental scalding.
- It uses a thermostat to control hot and cold water temperature
- Dual check valves protect against cross flow of hot water to cold and cold water to hot water piping
- An integral strainer with 40 mesh screen filters out debris
- Superior flow characteristics provide accurate temperature control with low pressure drop.

NOTE: Maximum shut-off head is 29 feet. Usable maximum head - assuming 150’ of lateral discharge through 3/4” pipe is 15 feet. Consult factory for proper sizing and calculation of friction losses.

Ascent Macerating Toilet System

3/4'' to 1'' Discharge

Liberty Pumps introduces the new Ascent™ macerating toilet system. Now you can have the freedom to install a bathroom easily where gravity drain lines do not exist without breaking floors. Perfect for remodeling or home additions, the system features an attractive elongated ADA comfort toilet with a macerating pump that pumps the waste to an existing gravity sewer line in the building. The pump can perform to vertical heads of 15' and runs of up to 150' horizontally.

WES-150 Waterless Replacement Cartridges

- The patented Cartridge is engineered to last for an average of 7000 uses and to receive waste through drain holes.
- Waste passes through an immiscible layer of biodegradable Sealant, continues through a Trap System, and flows over a Baffle to prevent the loss of Sealant.
- A Discharge Tube in the housing directs the flow of waste into the building drain system.
- The Cartridge is designed as a replaceable component when its function has been exhausted.

DURASTONE® UTILATWIN® Laundry Tubs

- High strength, one piece molded construction
- Produced with Mustee's proprietary DURASTONE® — combination of fiberglass and crushed stone blended with special resins for extra strength and durability
- Includes Twin-Drain Waste connector which joins drain assemblies to assure rapid and uniform waste water discharge…includes washers, slip nuts and stoppers.
- Divider wall between tubs is recessed one inch, permitting water to overflow from one tub to other, prevents water spilling onto floor.
- Large, self-draining back shelf with retainer curb that prohibits water run-off except into tub.
- 19 Gallon capacity per tub, extra deep 13" tubs with smooth surfaces
- Connects to standard 1-½" P or S trap
- Accommodates single or dual-handle faucets. 4" or 8" centers
- Floor model includes heavy gauge steel legs with adjustable levelers
- Wall model includes wall mounting bracket, side supports and mounting hardware for securing tub to concrete or stud wall
- Mold and mildew-resistant components
- Easy to assemble and install
- Color-fast, marbleized white finish

Easy Installation

Save water by eliminating the wait for hot water to reach the tap. Simply tap into the cold water line and in stall the heater directly at the sink. No need for costly recirculating lines and pumps. And when you want to eliminate the wait for hot water but need more volume, install the Eemax heater in-line with a larger hot water source, such as a tankless heater or a storage tank heater.

Lightweight and compact, the 2.5 and 4 gallon models plug into a standard 110 volt outlet.

Sandblaster Commercial Electric Heaters

MODELS - CSB 52, 82, 120
SURFACE MOUNT THERMOSTATS

ASME (OPTIONAL)

Sandblaster Commercial Electric Heaters
3 Year Limited Warranty on Tank

Designed for use as a recovery heater having its own storage tank. Note: Not recommended for sanitizing water application.

FEATURES

GOLD ELEMENTS - CSB models ship with the gold plated elements (see element availability chart on back). Patented gold elements provide long life and superior scaling resistance. Low watt density means lower surface temperature to minimize scale buildup and more surface to heat water. Gold elements carry a one-year warranty against failure due to lime scale build-up.

GLASS-LINED TANK - Three sizes: 50, 80 and 119 gallon capacity. Tank interior is coated with glass specially developed for water heater use. Tanks rated at 150 psi (1034 kPa) working pressure (ASME 150 psi). Foam insulation reduces costly heat loss, and isvermin proof.

FUSING - Protects all elements, thermostats, and internal wiring circuits against excesscurrent flow. Meets National Electrical Code requirements that non-ASME tanks must have internal fusing when current draw exceeds 48 amps.

STANDARD VOLTAGES - 208, 240 and 480V single-phase and three-phase delta. Convertible from three-phase to single -phase (in field) and vice versa. 277V single-phase also available.

TERMINAL BLOCK - Factory installed. Just bring the service to the heater and connect to block.

CONTROLS - One temperature control (adjustable through a range of 120° to 180°F) and manual reset high temperature cut-off per element. Thermostat step control may be achieved by varying settings on individual temperature controls. Located behind hinged control compartment door for quick, easy access.

OTHER STANDARD FEATURES -

*** Surface mounted thermostats *** Simplified circuitry, color coded for ease of service * Two anode rods for maximum corrosion protection
* Cabinet has bonderized undercoat with baked enamel finish
* Bottom inlet and top outlet openings * Brass drain valve * CSA / ASME temperature and pressure relief valve * Single panel control box.

Sandblaster Commercial Electric Heaters

MODELS - CSB 52, 82, 120
IMMERSION MOUNT THERMOSTATS

ASME (OPTIONAL)

Designed for use as a recovery heater having its own storage tank. Note: Not recommended for sanitizing water application.

ADVANCED ELECTRONIC CONTROL - Plain English text and animated icons display detailed operational and diagnostic information. Fault or Alert messages appear if an operational issue occurs. Immersion temperature control adjustable through a range of 90°F to 190°F.

ECONOMY MODE OPERATION - Control system automatically lowers the Operating Set Point by a programmed value during user-defined time periods. Helps reduce operating costs during unoccupied or off - peak demand periods.

LINEAR SEQUENCING - Banks of heating elements (3 elements per bank) are energized according to adjustable (1 to 20°) differential set points for each bank. First bank on is the last bank off. Helps reduce current surge and provides accurate water temperature control.

GOLD ELEMENTS - CSB models ship with the gold plated elements (see element availability chart on back). Patented elements provide long life and superior scaling resistance. Low watt density means lower surface temperature to minimize scale buildup and more surface to heat water. Gold elements carry a one-year warranty against failure due to lime scale buildup.

GLASSLINED TANK - Three sizes: 50, 80 and 119-gallon capacity. Tank interior is coated with glass specially developed for water heater use. Tanks rated at 150 psi (1034 kPa) working pressure (ASME 150 psi). Foam insulation reduces costly heat loss, and is vermin proof.

FUSING - Protects all elements, thermostats, and internal wiring circuits against excess current flow. Meets National Electrical Code requirements that non-ASME tanks must have internal fusing when current draw exceeds 48 amps. STANDARD VOLTAGES - 208, 240 and 480V single-phase and three-phase delta. Convertible from three-phase to single-phase (in field) and vice versa. 277V single-phase also available.

TERMINAL BLOCK - Factory installed. Just bring the service to the heater and connect to block.

Q

MAGNETIC CONTACTORS - Heavy duty, UL rated 100,000 cycles.

OTHER STANDARD FEATURES -

3 Year Limited Warranty on Tank

Various Gallon sizes and heights available to fit any commercial application

FEATURES

GLASS-LINED TANK - Thirteen sizes; 6 thru 119 gallon capacity. Tank interior is coated with glass specially developed for water heater use.

ELEMENTS - Zinc plated copper sheaths for longer life. Medium watt density means lower surface temperature to minimize scale build-up and more surface to heat water. Element sizes from 1.5 to 6 KW. Max input 12 KW

STANDARD VOLTAGES - 120, 277 single-phase and 480V unbalanced three-phase delta; easily converted to single-phase terminal block (except 208V with 5500 watt elements) Single element heaters, single-phase only..

TERMINAL BLOCK - Factory installed. Just bring the service to the heater and connect to block. Terminal block not supplied on 120V and 277 volt models. (No junction box on PCE 6-20)

CONTROLS - Temperature control (adjustable through a range of 130° to 170°F on single element and 120° to 181° on dual element) and manual reset high temperature cut-off per element (dual element models). Factory-wired for non-simultaneous operation; easily converted to simultaneous element operation (three phase models only).

ALL NEW CABINET MODELS FEATURE

AutoSense™ Technology
Monitors your water usage to determine the optimal frequency of regeneration, maximizing efficiency while minimizing salt and water usage.

Low Salt Monitor
Indicates the softener is working efficiently and flashes when the softener is getting low on salt, allowing you a few days to refill the salt tank.

High Capacity Media
Our long-lasting softening resin has more hardness holding capacity than standard resins, allowing you to go longer between regenerations.

Installation Kit
Our softeners come with everything needed to hook up to 1"NPT plumbing, including a bypass valve.

ALL TWO-TANK MODELS FEATURE

AutoSense™ Technology
Monitors your water usage to determine the optimal frequency of regeneration, maximizing efficiency while minimizing salt and water usage.

HE Regeneration
North Star systems use reverse flow during regeneration, proven to be the most effective way to clean a resin bed of hardness minerals.

Reinforced Media Tank
We only use durable, HDPE double-wrapped resin tanks to handle the maximum internal pressures.

K-400 K-380 Sewer Machine W/C-32 IW Cable 1-1/2" to 4" Lines

- Uses C31,C32,C33,C44,C45 Cables
- Integrated Transport Cart – allows for easy movement to and from the job site. Heavy-duty, over-molded rubber wheels easily navigate over bumps and upstairs.
- Integrated Telescoping Handle – provides high-handle height during transport. Handle locks in low position during drain cleaning operation or during transport to minimize space requirements.
- Cable Control System – causes the drum to stop spinning when the blade becomes lodged in a blockage, limits potential for cable to flip over in the drum and helps to indicate to operator when blockages are encountered.
- "Solid Core" Cable – uses tough 3/8" or 1/2" Integral Wound (IW) solid core cable that is rugged and kinkresistant. Each size comes in several lengths and utilizes a variety of the RIDGID quick-connect cutters.
- 1/3 HP motor spins cable at 1725RPM
- Drum Capacity: 75' of 1/2 or 100' of 3/8 Cable

PRICING

Our prices printed in this catalog are RW List Prices in effect on the print date. For updated pricing and information, please access our website. We reserve the right to correct errors, and omissions, and our prices are subject to change at any time, without notice. Orders will be priced at the current price and terms in effect at time of shipment.

JOB QUOTATIONS

We no longer provide job quotations or price protection, please refer to our website to estimate costs.

PAYMENT TERMS

We accept Cash, approved Check, Visa, MasterCard, AMEX Or Discover

OPEN ACCOUNT - LINE OF CREDIT

We offer an open line of credit to qualified institutions, companies, and professionals that have an approved credit application and personal guarantee on file. Our credit department approves all orders prior to shipment. In some cases, at our discretion, full or partial payment may be required prior to shipment. Buyer agrees to pay us within our payment terms. Our payment terms are Net, 30 days. We do not carry accounts over 30 days. Accounts that reach this point are put on credit hold and are subject to closure. A 2% service charge,(24% per year), or the highest allowed by law, is added to past due invoices. Buyer agrees to pay the sellers cost of collecting amounts due including court costs and attorneys fees.

DELIVERY

We can provide free local delivery from most of our locations, please call your local RW branch for more information. Out of town deliveries are shipped UPS or common carrier from our distribution center or the manufacturer and freight/handling is added to our pricing.

SPECIAL ORDERS

Special Orders require a non-refundable deposit be made before the item will be ordered. Freight and handling are added to our pricing. Special order items are not returnable. In the case that our supplier takes an item back, any shipping/handling charges and return shipping/handling will be deducted before credit is issued.

RETURNED MERCHANDISE

Upon request, normal RW stock items, in original packaging, in new resalable condition, may be returned in reasonable quantities within 30 days of purchase. Provide at the time material is returned, a copy of the original invoice and a reason for the return. We will inspect the return, and issue credit, less a minimum 15% restocking charge, to be applied to your account. Cash sale credits are paid by check and take up to 30 days to process. Non-stock, discontinued, final sale, or special order merchandise will not be considered for return. By Federal law after Jan 1, 2014, we are not permitted to conduct commerce (to buy, sell, credit, etc) on items over 2-1/2% lead content and effective immediately these items are offered for "final sale" and are not returnable.

WARRANTIES

All warranties on products sold, expressed or implied, are made by the manufacturer. Items purchased from us and returned to us, for warranty consideration by the manufacturer, should include all relevant information required by the manufacturer to process the claim which includes at a minimum:: proof of purchase (a copy of the original invoice), installation date, failed date, and a detailed description of the problem. We will present the claim to the manufacturer and upon receiving credit, issue credit to our customer.

Buyer agrees that oral statements made by sellers representative, or contained in general advertising, catalogs, flyers, etc., do not express or imply the merchantability of a product for a particular purpose. Buyer understands their sole remedy against the seller is to process the manufacturers warranty. Buyer agrees this remedy shall be satisfactory as long as the seller is willing and able to carry out the terms of the warranty, if any.

TAXES AND OTHER FEES

Sales Tax and any other governmental charge applicable to the sale, use or delivery of the product will be added to the price of the product and be the responsibility of the buyer unless a signed sales tax exemption certificate is submitted, in which case sales tax will not be charged.

SHORTAGES OR ERRORS

Shortage or error claims must be reported as soon as possible and no longer than 10 days after shipment.

NOTICE TO OWNER

Failure of your contractor to pay those supplying material to complete your job can result in the filing of mechanics lien on your property. To avoid this, ask your contractor for "lien wavers" from all persons supplying material on your job. Failure to do this may result in you paying for materials twice.

SECURITY INTEREST, TRANSFER OF GOODS

Buyer grants and seller retains a purchase money security interest in the goods purchased until all obligations of buyer to seller are satisfied and the goods are paid in full.

DELAY & CONSEQUENTIAL DAMAGES

Seller shall not be liable for loss, damage, delay, or failure of delivery resulting from flood, fire, embargo, strikes, riot or civil commotion, workmen conflicts, inability to obtain parts or materials, casualties, delays in transportation, governmental intervention or any other causes beyond sellers reasonable control. Seller shall not be liable for consequential damages from any cause whatsoever.

GOVERNING STATE LAW APPLIES

In the event these terms conflict with state law, our terms, and all rights and obligations hereunder shall be governed by the laws of the state where the sale occurred.

ACCURACY

Certain Illustrations, designs, and product descriptions used in this catalog are general representations only and do not represent all sizes and details and are not intended to replace the exact specifications or manufacturer data sheets.

How did you learn about us?_____

How can we help you the most?_____

Since its beginning in 1887, Reeves-Wiedeman Company has been a locally-owned family business. The name comes from the families involved; the Reeves family until 1940, the Wiedeman family from 1940 to the present time. City directories of the late 1800s show that in 1887, William K. Reeves a bookkeeper; his brother Edward K. Reeves, a plumber; Elizabeth (Reeves) Gray, and her husband, Alexander Gray formed Gray Plumbing & Heating at 1005 Walnut in Kansas City, Missouri. The firm sold and installed plumbing supplies. In 1894 the business moved around the corner to 113-115 East 10th St.

Another brother, Louis H. Reeves, who had been a bookkeeper at Crane Company, joined the family business. On November 29, 1897, Louis apparently split off from the others, incorporated as Reeves Supply Company and moved into new space at 1008 Grand.

In the 1920s and 1930s the business moved to 1304 McGee and was operated by Louis along with his loyal assistant, Edward R. "Eddie" Victor. Louis worked in the office, and was well-known for his morning suit, spat, derby hat, and cane, which is said to have contained a sword! Eddie handled the warehouse and delivery.

The two men earned a good reputation in the industry developing strong loyalties to both manufacturers and customers. Reeves became the first American Standard distributor west of the Mississippi River.

In the meantime, Walter A. Wiedeman, who was born in Chicago, son of a poor immigrant, moved to Kansas City with his family, and at a very young age went to work at US Supply Company. Wally had learned the business by working in every job in the business - warehouse, office and sales, while attending night school. He was there from 1915 until 1939. At that time he became interested in striking out on his own. He was attracted to Reeves Supply Company because of the availability of the American Standard fixture line. Louis Reeves wanted to retire, but had no-one to take over the business.

In early 1940, Wally bought Reeves Supply Company. To recognize the 53 years Louis Reeves and his family were involved in the business, Wally renamed the company and we have kept the name ever since. In 1946, the business was officially incorporated in Missouri as Reeves-Wiedeman Company.

HISTORY- Revised January, 2008
Page W - 8

W

Wally's business grew from friendships he built over many years. He is remembered for most for his surprises and gag gifts. He always had something in his pocket for those he met! His sons John A Wiedeman and Ted A Wiedeman joined him in the late forties and early fifties. They had learned the the business by growing up in it. About that time Eddie Victor who had helped Wally those first few years on his own, retired.

After the war, in the fifties, business was booming, so the company built and moved from 2611 Warwick to a larger, more modern facility, at 2711 Warwick. The company had now grown to 40 employees with branch operations in Wichita (1948), Kansas City, KS (1950) and Topeka (1957). In 1956 company headquarters in KCMO was completely destroyed by fire. Thanks to good friends among customers, manufacturers,and even our competitors, we were able to recover from the fire and continue growing stronger than ever.

In 1966 a branch was opened in Manhattan, KS. By this time John & Ted were running the company. In 1969, Wally's son-in-law Jack Rogler, joined the company, and brought us into the computer age. In the seventies we started a branch in the Ozarks, got into the heating and air conditioning equipment business, duct fabrication business, later closing all of these. In 1975 we also opened a branch in Lawrence, and built and moved to our new headquarters and distribution warehouse in Lenexa, Ks in 1976.

In the mid seventies, and during the eighties, the third generation of Wiedemans began with the company. Ted G Wiedeman (Ted Jr) & Walter A (Wally) Wiedeman, came on board in 1976. Kurt A. Wiedeman joined us in 1983 and William P. (Bill) Wiedeman joined us in 1986. The new generation reintroduced the computer age to the company in 1989 and began taking on new responsibilities leading to eventually take over the management and ownership of the company from John & Ted in February, 1994.

Along the way, the company opened branches in St. Joseph (1987), Riverside (1989), relocated KCMO Downtown (1991), Lee's Summit (1994), Leavenworth (1996), Olathe (2000), Emporia (2000), and Maryville (2001). Independence opened in 2005. In 2006, KCMO Waldo and Junction City opened. Liberty was opened in Jan 2008, Grandview in May 2008 and KCMO Midtown in Sept 2008. With the acquisition of Tallman Company of Sedalia, Warrensburg, Sedalia, Sunrise Beach and Osage Beach were opened in 2020.

Today, all of our locations are conveniently located, staffed by friendly, knowledgeable associates, and replensihed daily with a broad selection of the right products for plumbing professionals. We provide our customers, the right product, in the the right place, at the right time.
