Anvil International can trace its roots back to the 1800s. Today, we remain the largest and most complete fitting and hanger manufacturer in the world, with manufacturing facilities in Columbia, PA; Henderson, TN; Longview, TX; Simcoe, Ontario; and North Kingston, RI. Together, we produce a package of quality products unmatched by any other single manufacturer.

Supply Sales Company, formerly Grinnell Supply Sales and Manufacturing, is now Anvil International, Inc. The new name reflects a revitalized organization with a clear sense of purpose and direction. This new vision will allow Anvil International to better meet the flow control needs of its customers with focused product offerings that include Gruvlok® fittings and valves, malleable, forged and cast iron fittings, couplings, hangers and supports.

EZFlow Pipe-10' ASTM F-40

EZflow by Infiltrator is an environmentally friendly replacement to traditional stone and pipe drainfields using an engineered geosynthetic aggregate modular design. The EZflow system is designed to improve infiltration performance by eliminating the fines associated with crushed stone, and reducing compaction and embedment associated with stone. Preassembled units include a 3" or 4" perforated pipe surrounded by aggregate and held in place with a durable high-strength netting. This product comes in easy-to-contour 5' and 10' lengths and in diameters of 7, 8, 9, 10, 12, 13, or 14 inches.

- Always clean and free of fines
- Bundles are quick to install, saving costs on heavy machinery and labor
- Modular construction allows configurations to match trench dimensions for most system shapes and sizes
- Engineered for optimal storage and absorption efficiencies
- Ability to contour along sloped sites and around trees or landscaping
- Lightweight system is perfect for repairs and tight job sites
- Easily hand-carried into position reducing time and labor
- 10' lengths with simple snap, internal couplers
- Easier cleanup at the job site with the elimination of stone
- Manufactured from recycled materials rather than a mined natural resource
- Approved in many jurisdictions with an increased efficiency rating, reducing drainfield size
- Backed by the leader in the onsite wastewater industry

SureSeal Trap Devices

- Preassembled Inline Floor Drain Trap Sealer. 3 pieces: 1 commercial grade ABS plastic housing & proprietary neoprene rubber diaphragm with 2 soft rubber sealing gaskets.
- Creates a physical barrier to block sewer gases and their odors from escaping.
- New Construction: Used in floor drains to provide added protection against escaping sewer gases. Eliminates the need to repair/replace trap primers when they fail.
- Retrofit: Used in situations where trap primers have failed or where trap primers were never installed.

Flo Smart Water Monitor & Shutoff

- This innovative device constantly monitors the pressure and flow rate of the water moving through your home's pipes, detecting leaks as small as a drop per minute. If a leak is detected, you'll receive an alert through the app, and the Flo Shutoff can automatically shut off your water to prevent a minor leak from causing major damage.

- Automatic Shutoff
- Microleak Detection
- Real-Time Alerts
- Conservation Goals

Multiflex Thermostatic Mixing Valve

- Tank Booster Pro includes: Valve, Flex Hose, Tee can effectively double a households hot water heater capacity while while delivering hot water at safe temperatures
- Use with SharkBite® Flexible Water Heater Connectors for easy installation in systems using copper, CPVC or PEX tubing.
- Adjustable thermostatic mixing valve: Allows water to be stored at 140°F (60°C), which helps prevent the growth of Legionella bacteria,while keeping distributed water temperature at a safe 120° or below to prevent scalding.
- Precise temperature control - Design for point-of-use and point-of-source applications.
- Energy saving design - Decreases potential heat loss in household systems by up to 20%.
- More hot water from the same water heater - Higher storage temperature means a greater effective hot water volume, up
- Ease of use: - No soldering or glue. Quicker to install then a traditional t-pattern valve.

HG 145 Heatguard® Thermostatic Mix Valve

- Point-of-use thermostatic mixing valve designed to assist in the prevention of scalding.
- Superior, fast acting thermostatic element provides stable operation at flow rates as low as 0.34 gpm or as high as 5.8 gpm.
- Reduces the outlet flow to a trickle in the event of cold water supply failure.
- Inlet connections are typical supply line 3/8OD tube.
- Check valves at hot and cold water inlets.
- Compact design fits under or behind a single basin.
- Adjustable outlet temperature range: 95-118°F

LFUSG-B Guardian Thermostatic Mix Valve

- Series LFUSG-B Lead Free* Under Sink Guardian Thermostatic Mixing Valves are used in commercial and residential under-the-sink installations to maintain hot water at a desired temperature to avoid the risk of accidental scalding
- Thermostat controls hot and cold water temperature
- Dual check valves protect against cross flow of hot water to cold and cold water to hot water piping
- Integral strainer w/40 mesh screen filters out debris
- Superior flow characteristics provide accurate temperature control with low pressure drop

NOTE: Maximum shut-off head is 29 feet. Usable maximum head - assuming 150’ of lateral discharge through 3/4” pipe is 15 feet. Consult factory for proper sizing and calculation of friction losses.

Ascent Macerating Toilet System

3/4'' to 1'' Discharge

Liberty Pumps introduces the new Ascent™ macerating toilet system. Now you can have the freedom to install a bathroom easily where gravity drain lines do not exist without breaking floors. Perfect for remodeling or home additions, the system features an attractive elongated ADA comfort toilet with a macerating pump that pumps the waste to an existing gravity sewer line in the building. The pump can perform to vertical heads of 15' and runs of up to 150' horizontally.

WES-150 Waterless Replacement Cartridges

- The patented Cartridge is engineered to last for an average of 7000 uses and to receive waste through drain holes.
- Waste passes through an immiscible layer of biodegradable Sealant, continues through a Trap System, and flows over a Baffle to prevent the loss of Sealant.
- A Discharge Tube in the housing directs the flow of waste into the building drain system.
- The Cartridge is designed as a replaceable component when its function has been exhausted.

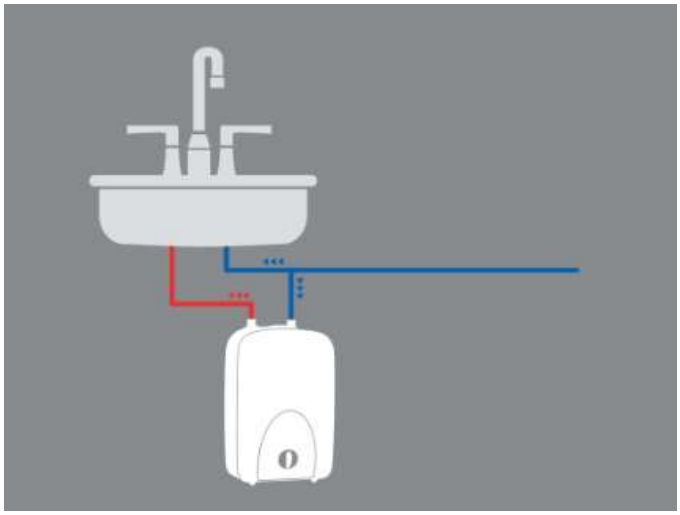
EEMAX- Eemax Electric Water Heaters

Eemax Electric Mini-Tank Water Heaters



- Save water - Installing the Mini-Tank under the sink puts hot water right where you need it – at the point-of-use, so there is no water going down the drain while waiting for hot water.
- Save energy - Point-of-use water heating eliminates long runs of pipe and long waits for hot water at the tap.
- Superior design - Impact and corrosion resistant exterior. Glass lined tank inside. Quick economical recovery and superior insulation for high efficiency.
- Save space - By installing an Eemax point-of-use heater, you eliminate the need for a large bulky storage tank.
- Easy to size
  1 gallon or 2.5 gallon for 1 sink
  4 gallon for 2 sinks
- Versatile applications - Homes, cottages, kitchenettes, Stores and offices, RVs and mobile homes, boats, Restaurants and hotels, Service stations, Warehouses and factories

- On Demand Hot Water - No Delay
- Cut Energy Waste - flow switch activates heater only on demand (no standby heat loss). 99% efficient
- Continuous Hot Water - no storage capacity to run out.
- Reduces Installation Cost - no T & P relief valve needed (check local codes).
- Easy Installation - only one cold water line need be brought to lavatory - integral ³/8" compression fittings on top (no sweat connections). Mounts on wall at point-of use.
- Integral Flow Restrictor - Built in to ensure proper temperature rise. Complies with U.S. Federal regulations.
- Faucet Aerator - with excellent spray pattern supplied with unit.
- Hands Free, sensor and metering faucet compatible
- Prevents Legionella Bacteria Growth
- Reduces Liming, Calcification and Sedimentation.
- Complies with Handicap Requirements
- Ni Chrome Element - a unique, patented flow path ensures optimum heat transfer and extended element life.
- Compact Size - dimensions 10.75" x 5.25" x 2.875"; weight 3 lbs.
- Field Serviceable Element - replaceable cartridge element (1 year warranty).
- Warranty - Full Factory Warranty - Heaters are guaranteed against failure due to leaks of "Heater Body/Element Assembly" for a period of FIVE YEARS.

Sandblaster Commercial Electric Heaters

MODELS - CSB 52, 82, 120
SURFACE MOUNT THERMOSTATS

ASME (OPTIONAL)

Sandblaster Commercial Electric Heaters
3 Year Limited Warranty on Tank

Designed for use as a recovery heater having its own storage tank. Note: Not recommended for sanitizing water application.

FEATURES

GOLD ELEMENTS - CSB models ship with the gold plated elements (see element availability chart on back). Patented gold elements provide long life and superior scaling resistance. Low watt density means lower surface temperature to minimize scale buildup and more surface to heat water. Gold elements carry a one-year warranty against failure due to lime scale build-up.

GLASS-LINED TANK - Three sizes: 50, 80 and 119 gallon capacity. Tank interior is coated with glass specially developed for water heater use. Tanks rated at 150 psi (1034 kPa) working pressure (ASME 150 psi). Foam insulation reduces costly heat loss, and isvermin proof.

FUSING - Protects all elements, thermostats, and internal wiring circuits against excesscurrent flow. Meets National Electrical Code requirements that non-ASME tanks must have internal fusing when current draw exceeds 48 amps.

STANDARD VOLTAGES - 208, 240 and 480V single-phase and three-phase delta. Convertible from three-phase to single -phase (in field) and vice versa. 277V single-phase also available.

TERMINAL BLOCK - Factory installed. Just bring the service to the heater and connect to block.

CONTROLS - One temperature control (adjustable through a range of 120° to 180°F) and manual reset high temperature cut-off per element. Thermostat step control may be achieved by varying settings on individual temperature controls. Located behind hinged control compartment door for quick, easy access.

OTHER STANDARD FEATURES -

*** Surface mounted thermostats *** Simplified circuitry, color coded for ease of service * Two anode rods for maximum corrosion protection
* Cabinet has bonderized undercoat with baked enamel finish
* Bottom inlet and top outlet openings * Brass drain valve * CSA / ASME temperature and pressure relief valve * Single panel control box.

STATE-CE- State Commercial Electric Water Heaters

Sandblaster Commercial Electric Heaters

MODELS - CSB 52, 82, 120
IMMERSION MOUNT THERMOSTATS

ASME (OPTIONAL)

Designed for use as a recovery heater having its own storage tank. Note: Not recommended for sanitizing water application.

ADVANCED ELECTRONIC CONTROL - Plain English text and animated icons display detailed operational and diagnostic information. Fault or Alert messages appear if an operational issue occurs. Immersion temperature control adjustable through a range of 90°F to 190°F.

ECONOMY MODE OPERATION - Control system automatically lowers the Operating Set Point by a programmed value during user-defined time periods. Helps reduce operating costs during unoccupied or off - peak demand periods.

LINEAR SEQUENCING - Banks of heating elements (3 elements per bank) are energized according to adjustable (1 to 20°) differential set points for each bank. First bank on is the last bank off. Helps reduce current surge and provides accurate water temperature control.

GOLD ELEMENTS - CSB models ship with the gold plated elements (see element availability chart on back). Patented elements provide long life and superior scaling resistance. Low watt density means lower surface temperature to minimize scale buildup and more surface to heat water. Gold elements carry a one-year warranty against failure due to lime scale buildup.

GLASSLINED TANK - Three sizes: 50, 80 and 119-gallon capacity. Tank interior is coated with glass specially developed for water heater use. Tanks rated at 150 psi (1034 kPa) working pressure (ASME 150 psi). Foam insulation reduces costly heat loss, and is vermin proof.

FUSING - Protects all elements, thermostats, and internal wiring circuits against excess current flow. Meets National Electrical Code requirements that non-ASME tanks must have internal fusing when current draw exceeds 48 amps. STANDARD VOLTAGES - 208, 240 and 480V single-phase and three-phase delta. Convertible from three-phase to single-phase (in field) and vice versa. 277V single-phase also available.

TERMINAL BLOCK - Factory installed. Just bring the service to the heater and connect to block.

MAGNETIC CONTACTORS - Heavy duty, UL rated 100,000 cycles.

OTHER STANDARD FEATURES -

Immersion style thermostats Simplified circuitry, color coded for ease of service. *Two anode rods for maximum corrosion protection * Cabinet has bonderized undercoat with baked enamel finish Bottom inlet and top outlet openings. * Brass drain valve CSA certified and ASME rated T&P Relief Valve
* Single panel control box

3 Yr Limited Warranty on Tanks

3 Year Limited Warranty on Tank

Various Gallon sizes and heights available to fit any commercial application

FEATURES

GLASS-LINED TANK - Thirteen sizes; 6 thru 119 gallon capacity. Tank interior is coated with glass specially developed for water heater use.

ELEMENTS - Zinc plated copper sheaths for longer life. Medium watt density means lower surface temperature to minimize scale build-up and more surface to heat water. Element sizes from 1.5 to 6 KW. Max input 12 KW

STANDARD VOLTAGES - 120, 277 single-phase and 480V unbalanced three-phase delta; easily converted to single-phase terminal block (except 208V with 5500 watt elements) Single element heaters, single-phase only..

TERMINAL BLOCK - Factory installed. Just bring the service to the heater and connect to block. Terminal block not supplied on 120V and 277 volt models. (No junction box on PCE 6-20)

CONTROLS - Temperature control (adjustable through a range of 130° to 170°F on single element and 120° to 181° on dual element) and manual reset high temperature cut-off per element (dual element models). Factory-wired for non-simultaneous operation; easily converted to simultaneous element operation (three phase models only).

CSA CERTIFIED AND ASME RATED T&P RELIEF VALVE

SIMPLIFIED CIRCUITRY, COLOR CODED FOR EASE OF SERVICE

ANODE ROD FOR MAXIMUM CORRISION PROTECTION

CABINET HAS BONDERIZED UNDERCOAT WITH BAKED ENAMEL FINISH

ALL NEW CABINET MODELS FEATURE

AutoSense™ Technology
Monitors your water usage to determine the optimal frequency of regeneration, maximizing efficiency while minimizing salt and water usage.

Low Salt Monitor
Indicates the softener is working efficiently and flashes when the softener is getting low on salt, allowing you a few days to refill the salt tank.

High Capacity Media
Our long-lasting softening resin has more hardness holding capacity than standard resins, allowing you to go longer between regenerations.

Installation Kit
Our softeners come with everything needed to hook up to 1"NPT plumbing, including a bypass valve.

ALL TWO-TANK MODELS FEATURE

AutoSense™ Technology
Monitors your water usage to determine the optimal frequency of regeneration, maximizing efficiency while minimizing salt and water usage.

HE Regeneration
North Star systems use reverse flow during regeneration, proven to be the most effective way to clean a resin bed of hardness minerals.

Reinforced Media Tank
We only use durable, HDPE double-wrapped resin tanks to handle the maximum internal pressures.

K-400 K-380 Sewer Machine W/C-32 IW Cable 1-1/2" to 4" Lines

- Uses C31,C32,C33,C44,C45 Cables
- Integrated Transport Cart – allows for easy movement to and from the job site. Heavy-duty rubber wheels navigate over bumps and upstairs.
- Integrated Telescoping Handle – provides high-handle height during transport. Handle locks in low position during drain cleaning operation or during transport to minimize space requirements.
- Cable Control System – causes the drum to stop spinning when the blade becomes lodged in a blockage, limits potential for cable to flip over in the drum and helps to indicate to operator when blockages are encountered.
- “Solid Core” Cable – uses 3/8" or 1/2" rugged and kinkresistant Integral Wound (IW) solid core cable. Comes in several lengths and utilizes a variety of RIDGID quick-connect cutters.
- 1/3 HP motor spins cable at 1725RPM
- Drum Capacity: 75' of 1/2 or 100' of 3/8 Cable
